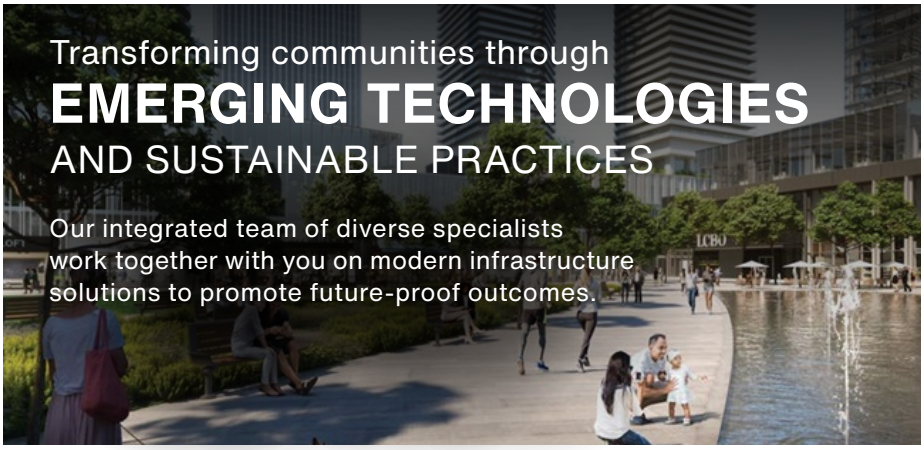
URBAN TRANSFORMATION

Transform today, thrive tomorrow

"Transformation" is a buzzword that gets thrown around a lot these days, with meanings that differ between individuals and organizations. But in a world of greater complexity, and information than we've ever had before, transformation is about forging new paths to limitless opportunity: new value, new efficiencies, and new ideas.

In other words, our age of transformation compels us to rethink how we can create value today and in the future. Transformation requires us to think bigger, and bolder. Why? Because incremental progress is not enough. Our cities and communities need sustainable growth in the face of constant change, and sustainable growth calls for agile reinvention. And that requires a level of integration and alignment that few can match.

Enter RVA's urban transformation services: an out-of-the-box solution that is fully integrated, and shown in practice to lower risk and shorten the path to sustained outcomes. By combining the industry, functional, and practical experience across RVA's solutions network, we offer clients the capability, framework, and technology bundles to unlock breakthrough value in ways that are evolutionary and revolutionary. Whether it's single-point, bespoke solutions or sector-specific, preconfigured integrations, our turnkey approach helps clients achieve returns in high-impact areas of projects, all while promoting sustainability and modernizing our infrastructure. Because it's not enough to transform today. We have to be able to evolve to get ahead and stay ahead – now, and in the future.



Featured projects

WEBBWOOD STORM SEWER REHAB

Client: City of Greater Sudbury
Location: Sudbury, ON

UNDERGROUND/ROAD PROJECT MANAGEMENT PROGRAMS

Client: City of Toronto
Location: Toronto, ON

AUBERGE ON THE PARK DEVELOPMENT

Client: Tridel & Rowntree
Location: Toronto, ON

Community Development

- Architectural support
- Building renovation support
- Construction support
